ABOUT SIM INFOSYSTEMS

"SIM INFOSYSTEMS is a global leader with over 20 years of experience specializing in the development of software solutions tailored for simulating process plant operations, control and safety systems across diverse industries".

We have completed more than 150 simulation projects for the Industrial and academic sectors.

Our customer base spanning across 85 Industries, 100 institutions and over 30 countries is a testament to our global footprint and commitment to serving diverse markets.

ProSimulator™ is a high-end virtual twin software package for training the plant operating personnel and engineering students.

ProSimulator™ provides opportunities to manipulate systems to simulate all possible emergencies and abnormalities, including plant startup and emergency shutdown that an operator has to face, when placed in the actual process plant control room. This ability of personnel to respond to micro second variations in the parameters of a process plant, ensure optimal production and absolute safety.

Sim Infosystems Offers:

- ▶ Custom designed simulator for process and power industries
- ▶ Standard simulation software for industrial training center and academic institute
- ▶ Skill development training services for industrial training center and academic institute

ProSimulator™ is a complete Virtual Twin package and consists of:

- ▶ Simulator hardware
- ▶ Instructor Station
- ▶ Emulation or Direct Connect Operator Station for various DCS
 - **ProSimulator™** Standard or Custom Process Models for:
 - ✓ Process control & Instrumentation
 - ✓ Basic process Operations
 - ✓ Refining
 - ✓ Gas Processing
 - ✓ Upstream Operations
 - ✓ Fertilizer
 - ✓ Chemicals
 - ✓ Petrochemicals
 - ✓ Power & Utilities
 - ✓ Utilities System
 - ✓ Metal processing
 - ✓ Bio and Food processing
- ▶ Pro-VFO, a 3D \ VR Field Operation Suite.
- ▶ Simulator for AI projects
- ▶ Interface Software
- ▶ User Documentation, Software License, training and support

ProSimulator™ Instructor station enables the instructor to control and direct the training sessions. From the Instructor station, multiple independent training sessions can be invoked by the Instructor and each training session can be assigned to work with one or more operator stations. Using this software, the Instructor can load a model, set an initial condition, invoke malfunctions, take/recall snapshot, change simulation speed and monitor & evaluate the performance of the trainees.

ProSimulator™ offers full function Direct connect simulator or provide emulation software for various DCS

- ▶ Yokogawa Centum CS3000
- ▶ Yokogawa Centum VP
- ▶ Honeywell TDC3000
- ▶ Experion
- ▶ Fox I/A
- ▶ Siemens PCS7
- ▶ DeltaV
- ▶ ABB Harmony
- ▶ ABB800xA
- ▶ Triconex PLC

Benefits of **ProSimulator™**

For Academic

- ▶ Hands-on Learning experience
- ▶ In-depth Process Understanding
- ▶ Carry out In-house projects
- ▶ Sound Fundamental Concepts of Process Control and safety with DCS Operations
- ▶ Industry readiness - Understanding the Intricacy & Complexity of process dynamics
- ▶ Complete edge for Internship and jobs
- ▶ Faculty Development
- ▶ Boosted accreditations ranking

For Industries

- ▶ Increase operator skills
- ▶ Improved Plant Safety and compliance to environmental regulations
- ▶ Increased familiarity of Controls & Interlock Systems
- ▶ Smooth Startup & Shutdown
- ▶ Faster Recovery from External/Internal Process Disturbances
- ▶ Higher workforce availability and reduce training time
- ▶ Evaluation of Operator Proficiency
- ▶ Minimize Operator turnover impact

PS0020: Model Development Package

ProSimulator™ Model Development package is a totally integrated set of simulation software development modules for process plants. It is a platform for engineers to configure, test, and document dynamic simulation models for process and power plants. The model configuration is template based and easy to build. The package consists of Simulation database, Simulation model library, Instructor configuration utility, Operator station configuration utility, Graphics builder and Model view / debugger.

ProVFO: VR and 3D Field Operations Suite

The ProVFO is a next generation Virtual Field Operations simulation training module, based on Virtual Reality (VR) technology. It is an interactive 3D virtual plant to assist the trainees to envisage and efficiently get hands on experience of the actual plant. It works with ProSimulator™ as an integrated module with real time communication.

Client List – Industries

Refineries

- ▶ Canada Oil Sands Surmont 2, Canada through Omega Simulation Co.
- ▶ Chennai Petroleum Corporation Limited thru' Yokogawa
- ▶ Chennai Petroleum Corporation Limited, Chennai, India.
- ▶ HPCL Mittal Energy Limited (HMEL) through Yokogawa
- ▶ Indian Oil Corporation Limited, Guwahati Refinery, India
- ▶ LUBREF, Kingdom of Saudi Arabia through Yokogawa
- ▶ Marjan Increment Development Program (MIP) through Yokogawa
- ▶ Nagarjuna Oil Corporation Limited, Chennai, India.
- ▶ Oman Refinery Company, Oman.
- ▶ Petro Rabigh, Saudi Arabia thru' Omega Simulation Co.
- ▶ Petron Batan, Philippines thru Yokogawa
- ▶ Refinery in Saudi Arabia through RSI SIMCON.
- ▶ Takreer Refinery, U.A.E through Yokogawa
- ▶ Takreer RRW, through Yokogawa

Gas / Oil Separation

- ▶ ADCO through Yokogawa
- ▶ ADMA ALNASAR through Yokogawa
